VOLUME 50 NUMBER 1 (published 16 June 1989) JULY 1989

Guest Editorial
David Kessel i HPD terminology

Rapid Communication
Ronald D. Ley, Lee A. Applegate, R. Steven Padilla and Thomas D. Stuart 1 Ultraviolet radiation-induced malignant melanoma in *Monodelphis domestica*

Articles
Jean-Philippe Demaret, Simone Brunie, Jean-Pierre Ballini and Paul Vigny 7 Geometry of intercalation of psoralens in DNA approached by molecular mechanics

Claire Pigault and Dominique Gerard 23 Selective degradation of amino acids photosensitized by tryptophan in polypeptidic structures

Jorge Davila and Anthony Harriman 29 Photosensitized oxidation of biomaterials and related model compounds

Moshe Toporowicz, Hanna Ofir, Haim Levanon, Emanuel Vogel, Matthias Köcher, Kakumanu Pramod and Richard W. Fessenden 37 Triplet state of metalloporphycenes: ZnPCl, PdPC2, PtPC2, and NiPC2

Cheryl A. Hanzlik, Robert S. Knox, Scott L. Gibson and Russell Hilf 45 Picosecond fluorescence of R3230AC mammary carcinoma mitochondria after treatment with hematoporphyrin derivative and Photofrin® II *in vivo*

John P. Pooler 55 Photooxidation of cell membranes using eosin derivatives that locate in lipid or protein to study the role of diffusible intermediates

Kumio Okaichi, Nobuyuki Kajitani, Katuko Nakajima, Keiichi Nozu and Takeo Ohnishi 69 DNA damage and its repair in *Dictyostelium discoideum* irradiated by health lamp light (UV-B)

G. Miolo, F. Dall'Acqua, E. Moustacchi and E. Sage 75 Monofunctional angular furocoumarins: sequence specificity in DNA photobinding of 6,4,4′-trimethylangelicin and other angelicins

Marija Poljak-Blaži, Maja Osmak and M. Hadžija 85 Resistance of human and mouse myeloid leukemia cells to UV radiation

Dan He, Nicholas A. Soter and Henry W. Lim 91 The late phase of hematoporphyrin derivative-induced phototoxicity in mice: release of histamine and histologic changes

Usha P. Andley and Barbara A. Clark 97 The effects of near-UV radiation on human lens β-crystallins: protein structural changes and the production of O_2^- and H_2O_2

Paulien Adamse, Janny L. Peters, Patricia A. P. M. Jaspers, Ageeth van Tuinen, Maarten Koornneef and Richard E. Kendrick 107 Photocontrol of anthocyanin synthesis in tomato seedlings: a genetic approach

Kotaro T. Yamamoto and Satoru Tokutomi 113 Formation of aggregates of tryptic fragments derived from the carboxyl-terminal half of pea phytochrome and localization of the site of contact between the fragments by amino-terminal amino acid sequence analysis

Kazuichi Yoshida, Atsushi Takimoto and Yukiko Sasaki 121 Fluence-response relationship for photogene expression in etiolated pea seedlings

Alberto L. Mancinelli and Jui Lim 125 Light perception by phytochrome *in vivo*

Heidemarie Oelze-Karow and Hans Mohr 133 An analysis of phytochrome-mediated threshold control of hypocotyl growth in mustard (*Sinapis alba* L.) seedlings

James G. Tokuhisa and Peter H. Quail 143 Phytochrome in green-tissue: partial purification and characterization of the 118-kilodalton phytochrome species from light-grown *Avena sativa* L.

Research Note
Nadira I. Sayed and Claud S. Rupert 153 Recovery of viral capacity in irradiated exponentially growing cells

VOLUME 50 NUMBER 2 (published 11 July 1989) AUGUST 1989

Notice i Photochemistry section

Articles

R. Cubeddu, R. Ramponi, W.-Q. Liu and F. Docchio 157 Time-gated fluorescence spectroscopy of the tumor localizing fraction of HpD in the presence of cationic surfactant

Ettore Bismuto and Gaetano Irace 165 Dynamic fluorescence of tryptophanyl residues in low molecular weight model compounds and proteins

David Kessel 169 Determinants of photosensitization by purpurins

S. Kimel, B. J. Tromberg, W. G. Roberts and M. W. Berns 175 Singlet oxygen generation of porphyrins, chlorins, and phthalocyanines

Susan Q. Kulp and H. Gaston Griggs 185 Photoreactivation of lethal damage and damage leading to chromatid deletions induced in G1 phase hamster × *Xenopus* hybrid cells by UV

Mitchell J. Magee, Margaret L. Kripke and Stephen E. Ullrich 193 Inhibition of the immune response to alloantigen in the rat by exposure to ultraviolet radiation

Andrew J. Rainbow 201 Relative repair of adenovirus damaged by sunlamp, UV and γ-irradiation in Cockayne syndrome fibroblasts is different from that in xeroderma pigmentosum fibroblasts

H. B. Stegmann, P. Schuler and H.-J. Ruff 209 Investigation of damage to forest by EPR spectroscopy *in vivo*

Graham E. Kelly, William D. Meikle and A. G. Ross Sheil 213 Effects of oral retinoid (vitamin A and etretinate) therapy on photocarcinogenesis in hairless mice

Joseph Alcalay, Stephen E. Ullrich and Margaret L. Kripke 217 Local suppression of contact hypersensitivity in mice by a monofunctional psoralen plus UVA radiation

David A. Bellnier, Yau-Kwan Ho, Ravindra K. Pandey, Joseph R. Missert and Thomas J. Dougherty 221 Distribution and elimination of Photofrin II in mice

Marília Netto and Hiss Martins-Ferreira 229 Elicitation of spreading depression by rose bengal photodynamic action

Jérome Lavergne 235 Difference spectra of the oxidized intermediates in the photosynthetic oxygen-evolving system: evidence for a small $S_0 \rightarrow S_1$ absorption change

J. Mallefet and F. Baguet 243 Oxygen consumption and luminescence of isolated *Porichthys* photophores in response to adrenergic stimulations

S. H. Lee, Q. Niu, X. C. Sheng and G. D. Mendenhall 251 Measurement of induction periods in inhibited free-radical oxidation by infrared chemiluminescence at 1270 nm

Eduardo Silva and Giuseppe Cilento 259 Dual effects of tryptophan in the horseradish peroxidase system that generates triplet acetone

Research Note

F. López-Figueroa and F. X. Niell 263 A possible control by a phytochrome-like photoreceptor of chlorophyll synthesis in the green alga *Ulva rigida*

Review Article
